E-Power with The  
New Energy Wand

# What Is The Energy Wand?

The New Energy Wand is designed to be used at the same time as the E-Power. It was designed to unblock the “Chi” blockages throughout the body by opening up their pathways using the Negative Potential Energy provided by the E-Power.

**Action! Make it possible!**

# Why the E-Power + The Energy Wand?

If we use the New Energy Wand while we are on the E-Power, The Energy Wand will act as a conductor of the Negative Potential Energy.

By evenly gliding The Energy Wand on the skin and along the meridian pathways, it will unblock the energy blockages in these pathways and stimulate the blood flow.

# Testimonial

My husband, Kent Murphy was diagnosed with Parkinson's disease 5 years ago, he did not take any medication and was just using the HTE equipment. Last year he was diagnosed with Prostate cancer, he ended up with two surgeries with therapy and special physiotherapies for recovery.

Kent had a shoulder injury from a football accident when he was young, and the Parkinson's made it progressively worse. He had been using the E- power and all other HTE equipment, when Richard Chuang used the new Energy Wand on his shoulder. He got very instant relief and he was able to raise his problem right arm over his head and after

the new energy wand treatment; I also found overall body energy improve thru his louder voice and better strength on his writing hand which normally is so weak. It was really amazing as you know he has not had that freedom for long period of time.

# Testimonial

I had severely sprained my ankle in Jan, 2014. I went to get X-Rays to make sure it was not broken. People were telling me that I could work it out. But after two months, I went to a chiropractor and he was surprised that it hadn't gone down yet. This was until June when I had received the E-power with the New Energy Wand treatment and Body Profile for about 10 minutes.

The swollen ankle went down to at least 30+%. I was so amazed and continued to use the E-power with the new Energy Wand for two to three more sessions. It is not 100% recovered yet, but it really helped my swollen ankle a lot!

# Energy Wand Q&A

**Q –Where should I plug in the Energy Wand?**

*A –The Energy Wand does not need to be plugged in and is actually very easy*

*to use. Just let the cable of the Energy Wand lie on the floor and gently glide the Energy Wand over areas of discomfort. The Energy Wand needs to be used together with the E-Power.*

**Q –How do I clean the Energy Wand?**

*A –It's easy! To clean the Energy Wand, use an alcohol pad or a cloth/paper towel damped in soapy water, and gently rub the pins.*

**Q –If someone has a very high bed, can the Energy Wand be used if the end of the wire does not touch the floor?**

*A –Yes, if the end of the wire on the Energy Wand cannot make contact with a floor or a surface, it will still be activated and conduct negative potential energy from the E-Power. However, it will not be as effective as being fully grounded and making contact with a floor or surface. For this situation, it is recommended to turn the EPA to a higher level.*

**Action! Make it possible!**

**Q –Why does the orange indicator light not turn on all the time when I use the Energy Wand on my self?**

*A –Please note, the activation light may not illuminate if the E-Power user operates the Energy Wand on oneself. This is because the user is surrounded by a significant amount of negative potential with much less positive field action to ground the Energy Wand. However, the Energy Wand will still conduct negative potential electricity along any desired areas where placed. The Energy Wand will be more effective if operated by someone other than the E-Power user because of their positive field area.*

**Q –Is the Energy Wand supposed to cause the hairs on my arm to burn?**

*A –Please be aware that it may be possible for the Energy Wand to cause small fine hairs along the arms and legs to burn away and omit a burning smell. This is normal and considered to be a natural occurrence from the strength of the negative potential electricity. It should also be noted that the Energy Wand should not stay still on the same spot for more than 3 seconds.*

**Action! Make it possible!**

**Q –Should pressure be applied when making contact with the Energy Wand on the skin?**

*A –No, pressure should NOT be added when operating the Energy Wand on oneself or another person. The Energy Wand should be gently glided on the skin with no added pressure while making sure all pins are in contact.*

**Q –Do I have to follow the meridian pathways when using the Energy Wand?**

*A –No, the meridian pathways should only be followed when treating oneself or someone else based on the results from an EMD test to help balance those particular areas. The Energy Wand can simply be used by gliding it on a direct area where there is discomfort.*
