## Traditional Chinese Medicine

Traditional Chinese Medicine (TCM) is built on the foundation that all things in nature are connected and contain a vital energy called Qi (pronounced "Chi"). Qi is made up of many different types of energy and must maintain a balance. In our body Qi can be heat, cold, blood, fluids, bone etc. Good health is obtained when all the types of Qi are in balance and flowing smoothly. When the energy of our organs, tissues, joints, circulation, and digestion are in harmony, good health occurs. When the different forms of energy of the body are not in harmony, the Qi or energy becomes blocked or interrupted creating a pattern in our body which often results in ill health. TCM believes Qi flowing freely creates a harmonious balance and promotes health.

The SOQI Products focus on various forms of Qi energy offering a unique and total holistic health package. The SOQI Products use thermal, motion, electrical and nutritional energy to promote balance and the flow of energy throughout the body.

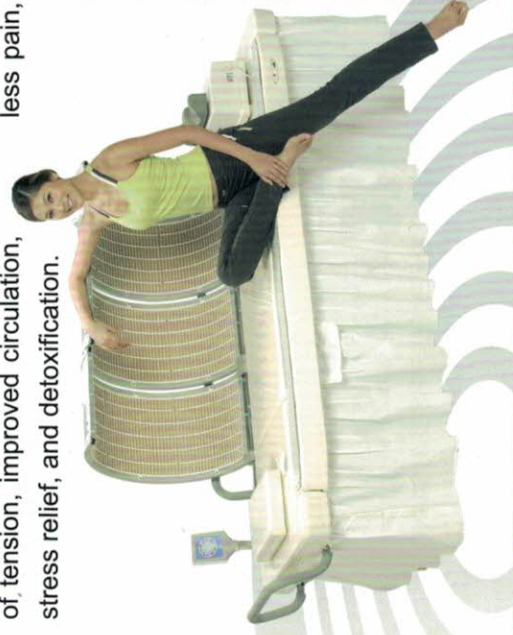

## The SOQI Bed
